MY MEMORIES FROM SCHOOL

Hello everyone!

My name is Natalia. I'm 20 years old and I study English philology at Państwowa Wyższa Szkoła Zawodowa in Krosno. But I was a student of this school.

But let's start from the beginning. When I was 16 I had to choose secondary school. I didn't know which school to choose but I knew one thing: I wanted to learn English. Finally I chose so called 'Szczepanik'. And – honestly – it was one of the best decisions of my life. It was technical school and my profession was a freight forwarder. A freight forwarder is a person who organises transport. At first I was afraid. I didn't know what would happen to me. But I gradually got used to the new situation. After a few first months of learning in the new school it was quite good. I liked the school very much. Obviously, there were good moments and also bad ones. I had to learn hard, I used to sleep even 5 hours a day but it was worth it because I gained something what will stay with me forever – knowledge. This school is where I learnt very huge part of English. But it was thank to my teacher, who helped me very, very much. He told me what to do, how to learn but first of all he believed in me and he wanted to help me.

Unfortunately, all good things come to an end. The last form in this school finally came and I had to focus on my matura exams and professional qualifying exam. On the other hand, there was also something nice – the prom. It was quite a good party :) After the prom time was passing so quickly! And finally April came and it was time to say 'goodbye' to the school. I really didn't want to finish school because I loved it. I just liked to be here, to spend time here, in this building, in those classrooms with those people. But I had to say 'goodbye'. And then, in May I had to take all the exams. I was very nervous about them but it proved to be unnecessary because the results were quite good.

Although I had to leave the school, one thing is for sure: it was the best 4 years of my life!

Thank you for listening to me ☺
